Report to the Passenger Transport Committee  
By Dr Dave Watson, Divisional Manager Transport

### **Willingness to Pay Survey - Transmission Gully**

#### **1. Purpose**

To present the results of the second and final part of the Transmission Gully Willingness to Pay Survey.

#### **2. Background**

The results of the first Transmission Gully Willingness to Pay Telephone Survey were made public on Tuesday 11 May 1999. A copy of the consultant's report was circulated to all members of the Committee at about the same time. The results of the second part of the survey are expected to be available at this meeting. They will provide more information on what amount and by what method people are prepared to contribute to get Transmission Gully built earlier than it would otherwise be.

#### **3. Comment**

A presentation of the results of the second Transmission Gully Willingness to Pay Survey will be made. Clearly it will be necessary to absorb and understand the results prior to coming to any conclusions on what action might follow.

#### **4. Recommendation**

*That the results of the second Transmission Gully Willingness to Pay Survey be received.*

Report prepared by:

DAVE WATSON  
Divisional Manager, Transport
