## Power Savings

### Spoke to Stephen Garlick (HCC) – Tuesday, 7 August 2001

- Happy with moving to 14% saving at \$24,000 cost
- Would like Petone not to happen at this stage
- And then move progressively into diesel generators if required – last resort
- Suggested water conservation be considered
- Also would like to be consulted when it is decided and they will assist with water conservation messages.

-----

### Spoke to Tim Davin (PCC) – Tuesday, 7 August 2001

- Whole hearted support for Stage 1
- Then Petone
- Generators last resort
- Would like to encourage WRC to do its bit.

-----

### Spoke to Lachlan Wallach (UHCC) – Wednesday, 8 August 2001

- Lachlan's view was – would probably support the 14 percent saving option.
- Generally agree with WRC's position now, i.e. Is there a crisis? Why should we pay?
- But will go along with some initiative.

-----

### Spoke to Andrew McKenzie (WCC) – Wednesday, 8 August 2001

- Would support moving to 14 percent saving at this stage.
