Bird Capture Akatarawa Forest Block

Conditions on the capture and Transfer of Bellbirds, Whiteheads and Tomtits from the Akatarawa Forest Block. These are to reinforce and add to the Akatarawa Block information sheet.

- All vehicles used will keep to the speed restrictions as per the signs. If no visible signs are noted then vehicle speeds shall not exceed 30 kph.
- No vehicle access is permitted to areas where bird capture is not in progress. Vehicles must stay with capture team at all times.
- The only vehicle access to waterways is when crossing a ford. River travel must be kept to a minimum.
- The gate at McGhies Bridge must be kept locked at all times on entry and exit.
- Vehicles will drive with their lights on at all times in the forest block
- The Karori Wildlife Sanctuary will provide a report to the Landcare advisor, Environmental stewardship. The report will also include a record of the numbers and locations of bird species caught.
- Signage will be used at all capture sites as discussed to make other forest users aware of the work in progress.
- Other forest users will be made aware of any campsites through caution tape and or signage.

I _____ of Karori Wildlife Sanctuary Trust have read the above conditions and agree to them.
