Subject: RE: Greater Wellington website comments.

Hi i received your reply and my answer is...its a regional policy statement...which the council has no idea what is at stake.there are many positions in the city council that also should have staff cuts aswell whom many are all for show and play computer games chat on phones to family and friends or eiather doing their nails all for what..being employed and get paid for doing nothing that is needed the most for the community such as those who are in state housing and those with winz and income. i am the only person who has a better plan for the community meaning low income handouts but yet to be heard and excepted, who knows. my aim is to put our youths in a better inforestructer that enables them to have something to look forward to for their future..thanks for having the time to read my statement hope to hear from yah
