### 3.1 Consent trends and significant non-notified resource consents

The consent numbers processed during this time period continue the trend of being just over half that of the same period for the previous year.

A range of consents have been processed during this time period on a non notified basis. No limited notified or fully notified consents were granted during this period.

Consents processed include consents for earthworks to upgrade the Transpower substation at Haywards Hill. A number of meetings were held with Transpower representatives prior to the consent being processed, and Greater Wellington provided extensive pre-application advice. The result was a smooth running consent process.
