

Relationship between proposed Plan policies and rules

- The policies and rules listed here are as proposed on 31 July 2015 and do not include any recommended amendments of the policies and rules by Officer's.
- Where a policy is said to relate to all the rules in the proposed Plan it was determined that there was no useful way to highlight a set of more specific rules
- Where specific rules are identified these are the most specific rules (not necessarily all the rules). For example, in respect of Policy P40 all permitted activity rules seek to protect sites with significant biodiversity, but only the permitted activity rules that make specific reference to Schedule F have been listed.
- Discharge to land rules only relate to the discharge of contaminants into or onto land as per the notified version of the Proposed Plan
- Yellow highlights show changes to the table sent to the Panel by Mr Denton on 4 May 2018.
