

Form 33
Notice of person's wish to be party to proceedings
Section 274, Resource Management Act 1991

**To the Registrar
Environment Court
PO Box 5027
Wellington 6145**

I, Regional Public Health, wish to be a party to the following proceedings:

[state—

- *the Environment Court's reference number for the proceedings (eg, RMA 232/2003); or*
- *the parties to the proceedings and the nature of the proceedings (eg, an appeal on a resource consent application or an application for an enforcement order)].*

ENV-2019-WGN-

Wellington Water Limited, Appellant

An appeal under clause 14 of Schedule 1 to the Act in relation to the proposed Natural Resources Plan for the Wellington Region

I am

a person who made a submission about the subject matter of the proceedings.

I am not a trade competitor for the purposes of [section 308C](#) or [308CA](#) of the Resource Management Act 1991.

I am interested in part of the proceedings.

*The part of the proceedings I am interested in is:

[*explain which part or parts of the proceedings you are interested in*].

Discharges to land and water, pertaining to Discharge of solid animal waste to land

I am interested in the following particular issues:

[*explain which issues raised by the appeal you are interested in*].

Wellington Water Limited appeal point 18.2 (Rule 85 Compost, solid animal waste, silage and refuse).

I support (*or oppose or conditionally oppose*) the relief sought because—

[*state why you support or oppose the relief sought, giving clear reasons for your views*].

Regional Public Health supports the relief sought by Wellington Water Limited. Regional Public Health originally submitted supporting the definition of “animal effluent” which

included solid faeces from animals. Regional Public Health also submitted on Rule 83 to strengthen the conditions to prevent nitrate contamination of water.

Regional Public Health do not believe that a permitted activity status is appropriate for discharge of solid animal waste within a Community Drinking Water Supply Protection Area.

The disposal of collected animal effluent including solid waste to land has the potential for pathogens and nutrients to be mobilised, especially during periods of heavy rainfall. Regional Public Health believes the appropriate activity status for the activity within a Community Drinking Water Supply Protection Area is restricted discretionary. This is in keeping with the recommendation from the S42A Report Discharges to Land, Barry Loe, March 2018, paragraph 87.

I agree to participate in mediation or other alternative dispute resolution of the proceedings.

(Dr Jill McKenzie, Medical Officer of Health)
